## Purpose

The purpose of this document is to highlight the significant changes to the AZ-400T04: Implementing Dependency Management course from the previous release. This document is for Microsoft Certified Trainers and Instructors to use before they deliver the class or during preparation for teaching the class.

This is not an error log or a supplement to the Course Materials. This document just provides additional context so that you can understand the major changes to the course content. Most of the course materials in the MCT Download Center have been updated to fix typos, broken links, and formatting. So, we recommend you always download the latest copies.

✓ Please read the Instructor Preparation Guide which provides the overall strategy for implementing this training.

## Update Date - Oct 2019

### Global Change – Change across all modules

All video files have been removed from the course.

In the following instances, the video files were replaced with text. The following content is, therefore, new:

- Modules/M01-Designing a Dependency Management Strategy/L03-Package Management/03-Demonstration Creating a Package Feed
- Modules/M01-Designing a Dependency Management Strategy/L03-Package Management/04-Demonstration Pushing a Package
- Modules/M01-Designing a Dependency Management Strategy/L03-Package Management/05-Demonstration Promoting a Package
- Modules/M01-Designing a Dependency Management Strategy/L03-Package Management/07-Demonstration Pushing from the Pipeline
- Modules/M01-Designing a Dependency Management Strategy/L04-Implement a Versioning Strategy/03-Demonstration Promoting a Package
- Modules/M02-Manage Security and Compliance/L04-Integrating License and Vulnerability Scans/02-Demonstration Whitesource Bolt
